

Wing Caucasus – Bringing Wing’s Drone Delivery to Georgia

Wing Caucasus is my initiative to bring Wing’s drone delivery technology to Georgia’s most dynamic tourism regions — from the high-altitude ski resorts in the Caucasus Mountains to the Black Sea coast and world-class spa destinations. Over the past four years, I have closely followed Wing’s progress, while actively preparing the local foundation: securing relevant Georgian domains, building a recognizable brand presence, and researching operational opportunities in tourism and logistics.

Our Vision

My goal is to establish Wing Caucasus as Wing’s trusted local partner in Georgia, ensuring that this transformative technology integrates seamlessly with the country’s tourism infrastructure and beyond.

Why Georgia?

- Rapidly growing tourism industry (mountains, seaside, spas)
- High seasonal demand in hard-to-reach locations
- Strong digital infrastructure and local readiness
- Strategic hub between Europe and Asia

Preparation already done:

- Domains secured: wingcaucasus.ge, wingdronedelivery.ge
- Brand presence: logo, landing page, communications
- Local business groundwork in progress
- Early outreach to stakeholders in tourism & tech sectors

We believe that Wing Caucasus can accelerate Wing’s expansion into Georgia by providing local expertise, trusted presence, and a clear entry strategy.

Best regards,

Goga Chkheidze
